# Introducing the Econ-ARK: Economics "Algorithmic Repository and toolKit"

Generic Presentation

June 21, 2018

State-of-the-art tools for:

Who, What, Why June 21, 2018

State-of-the-art tools for:

Solving microeconomic dynamic stochastic optimization problems

Who, What, Why June 21, 2018

#### State-of-the-art tools for:

- Solving microeconomic dynamic stochastic optimization problems
  - 'Hard' Bellman problems with uncertainty, 'kinks,' nonconvexities

#### State-of-the-art tools for:

- Solving microeconomic dynamic stochastic optimization problems
  - 'Hard' Bellman problems with uncertainty, 'kinks,' nonconvexities
- Simulating populations of agents

#### State-of-the-art tools for:

- Solving microeconomic dynamic stochastic optimization problems
  - 'Hard' Bellman problems with uncertainty, 'kinks,' nonconvexities
- Simulating populations of agents
  - Whether or not they are solving DSOP

Who, What, Why June 21, 2018

#### State-of-the-art tools for:

- Solving microeconomic dynamic stochastic optimization problems
  - 'Hard' Bellman problems with uncertainty, 'kinks,' nonconvexities
- Simulating populations of agents
  - Whether or not they are solving DSOP
  - Allows disciplined exploration of deviations from RE

Who, What, Why

June 21, 2018

#### State-of-the-art tools for:

- Solving microeconomic dynamic stochastic optimization problems
  - 'Hard' Bellman problems with uncertainty, 'kinks,' nonconvexities
- Simulating populations of agents
  - Whether or not they are solving DSOP
  - · Allows disciplined exploration of deviations from RE
- Finding equilibria for markets/economies populated by such agents

## Who Has Produced It?

Name	TLA	Affiliation
Christopher D Carroll	CDC	JHU, CFPB
David C Low	DCL	CFPB
Nathan M Palmer	NMP	OFR
Matthew N White	MNW	UDel, CFPB
Alex Kaufman	ABK	$CFPB \to Princeton$

Nothing herein may be interpreted as reflecing opinions of

CFPB - United States Consumer Financial Protection Bureau

JHU - Johns Hopkins University

IMF - International Monetary Fund

OFR - Office of Financial Research, U.S. Treasury

UDel - University of Delaware

• Hired CDC as Chief Economist with this as a key priority

- Hired CDC as Chief Economist with this as a key priority
- Hired NMP as intern to get started

- Hired CDC as Chief Economist with this as a key priority
- Hired NMP as intern to get started
- Hired MNW as Visiting Scholar to work on it

- Hired CDC as Chief Economist with this as a key priority
- Hired NMP as intern to get started
- Hired MNW as Visiting Scholar to work on it
- Hired DCL as new economist last year

- Hired CDC as Chief Economist with this as a key priority
- Hired NMP as intern to get started
- Hired MNW as Visiting Scholar to work on it
- Hired DCL as new economist last year
- Hired ABK as RA

## Big Grant from Alfred P. Sloan Foundation!

Three Years

## Big Grant from Alfred P. Sloan Foundation!

#### Three Years

• Hire Programmers, RA's, Open Source Project Managers, etc etc

• Heterogeneous Agent Macro Models

 Who, What, Why
 What
 June 21, 2018
 6 / 17

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit
  - HARK!

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit
  - HARK!
- Structural Micro Models (e.g., labor, health)

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit
  - HARK!
- Structural Micro Models (e.g., labor, health)
- 10 models with equilibrim between consumer agents and firm agents

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit
  - HARK!
- Structural Micro Models (e.g., labor, health)
- 10 models with equilibrim between consumer agents and firm agents
  - Unlike Noah's, our ARK can hold more than two of each kind!

- Heterogeneous Agent Macro Models
  - Original name: Heterogeneous Agent Resources and toolKit
  - HARK!
- Structural Micro Models (e.g., labor, health)
- 10 models with equilibrim between consumer agents and firm agents
  - Unlike Noah's, our ARK can hold more than two of each kind!
  - Ultimate goal: Get examples on the ARK of all types of animal (model)

- **1** Micro Structural Modeling  $2017 \approx \text{Econometrics circa } 1970$ 
  - 1970 econometrics: Write your own matrix inversion package!

- **1** Micro Structural Modeling  $2017 \approx \text{Econometrics circa } 1970$ 
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms

- Micro Structural Modeling 2017  $\approx$  Econometrics circa 1970
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:

- Micro Structural Modeling 2017  $\approx$  Econometrics circa 1970
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:
  - Each paper is hand-crafted work of art involving years of work

- **1** Micro Structural Modeling  $2017 \approx \text{Econometrics circa } 1970$ 
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:
  - Each paper is hand-crafted work of art involving years of work
    - Impenetrable spaghetti code; from generations of copy-and-paste

- **1** Micro Structural Modeling  $2017 \approx \text{Econometrics circa } 1970$ 
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:
  - Each paper is hand-crafted work of art involving years of work
    - Impenetrable spaghetti code; from generations of copy-and-paste
  - Progress very slow

- **1** Micro Structural Modeling 2017  $\approx$  Econometrics circa 1970
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:
  - Each paper is hand-crafted work of art involving years of work
    - Impenetrable spaghetti code; from generations of copy-and-paste
  - Progress very slow
  - Confidence is not very high

- **1** Micro Structural Modeling  $2017 \approx \text{Econometrics circa } 1970$ 
  - 1970 econometrics: Write your own matrix inversion package!
  - 2017 structural: Write your own numerical convergence alogrithms
- In practice:
  - Each paper is hand-crafted work of art involving years of work
    - Impenetrable spaghetti code; from generations of copy-and-paste
  - Progress very slow
  - Confidence is not very high
  - Papers that could benefit from including theory do not do it

# Why: Goals

Make it *much* easier:

# Why: Goals

Make it *much* easier:

• To get started doing structural Heterogeneous Agent modeling

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models
- To compare models to each other

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models
- To compare models to each other
- To add new capabilities

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models
- To compare models to each other
- To add new capabilities
- To mix-and-match components/modules/agent types

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models
- To compare models to each other
- To add new capabilities
- To mix-and-match components/modules/agent types

#### Make it *much* easier:

- To get started doing structural Heterogeneous Agent modeling
- To teach newcomers how to use such models
- To compare models to each other
- To add new capabilities
- To mix-and-match components/modules/agent types

Remove the excuse 'Structural model was not worth the effort'

#### Who?

• Participation: CFPB, OFR, IMF

#### Who?

- Participation: CFPB, OFR, IMF
- Interest From: FRB, ECB, BLS

#### Who?

- Participation: CFPB, OFR, IMF
- Interest From: FRB, ECB, BLS

#### Who?

- Participation: CFPB, OFR, IMF

9 / 17

Why?

## Why? Welfare Analysis With Heterogeneity

Sensible cost-benefit analysis requires:

• Estimates of distribution of heterogeneous outcomes

### Why? Welfare Analysis With Heterogeneity

Sensible cost-benefit analysis requires:

- Estimates of distribution of heterogeneous outcomes
- Utility or other weighting of those outcomes

## Why? Welfare Analysis With Heterogeneity

Sensible cost-benefit analysis requires:

- Estimates of distribution of heterogeneous outcomes
- Utility or other weighting of those outcomes
- → Structure
